Company

QuickPass specializes in technological solutions for comprehensive Human Resources management. Our software optimizes critical processes such as time management, document management, and performance evaluation. We believe in empowering companies and their teams by facilitating an inclusive and collaborative work environment.

Problem and solution

Is your HR team facing disconnected and complex processes?
Lack of integration between tools leads to data dispersion and productivity losses. This not only impacts efficiency but also hinders decision-making.

QuickPass integrates all processes into a single, intuitive platform, enabling companies to manage processes efficiently and productively. By unifying critical functions, we reduce administrative burden, minimize errors, and provide detailed analysis that supports strategic decisions.

Product and service

Time and Attendance: Automated attendance, clock-in, and clock-out management with geolocation, including configurable dashboards and reports for streamlined monitoring.

Employee Portal: A space that offers access to digital records, electronic signatures, and benefits management, improving communication and the flow of requests.

Performance Evaluation: Customize 360° and 180° evaluations and use people analytics to make informed decisions about employees.
