

We're an IT consulting company delivering tailored solutions through two core business units:

Robotic Process Automation + AI

We specialize in automating business processes using Microsoft technologies (Power Platform, Azure, and AI). **We develop custom software robots (RPA) to:**

- Automate repetitive tasks like bank reconciliations, receipt entry, and expense reporting.
- Extract data from web portals
- Seamlessly integrate with any ERP system
- Streamline operations across tax, finance, administration and sales.

Professional IT & Cybersecurity Services

We're certified specialists in ManageEngine Service Desk, ESET, Acronis, and Kaseya. **We provide end-to-end support for the operation, management, and security of your IT infrastructure:**

- Outsourcing operations such as **backup, monitoring, and local or cloud support.**
- **IT help desk** consulting and deployment.
- **Managing projects** like migrations from on-premises to Azure and Microsoft environments.
- Designing and implementing **contingency and data protection plans.**
- Delivering **cybersecurity solutions** including audits, DLP, session management, password management and more.

Key Metrics

- *Over 40 specialists.*
- *More than 600 projects delivered.*
