

Profile

Sector: Technology

Services:

- Logistics management platform
- Production planning
- Operations scheduling
- Supply chain optimization
- Process simulation

Foundation: 2021

People on the team: 13

Technologies:

- Mathematical optimization
- Machine Learning
- Artificial intelligence
- Simulation
- Big Data

Nonlinear Tecnología S.R.L.

We are a technology-based company consolidated from various development and research projects.

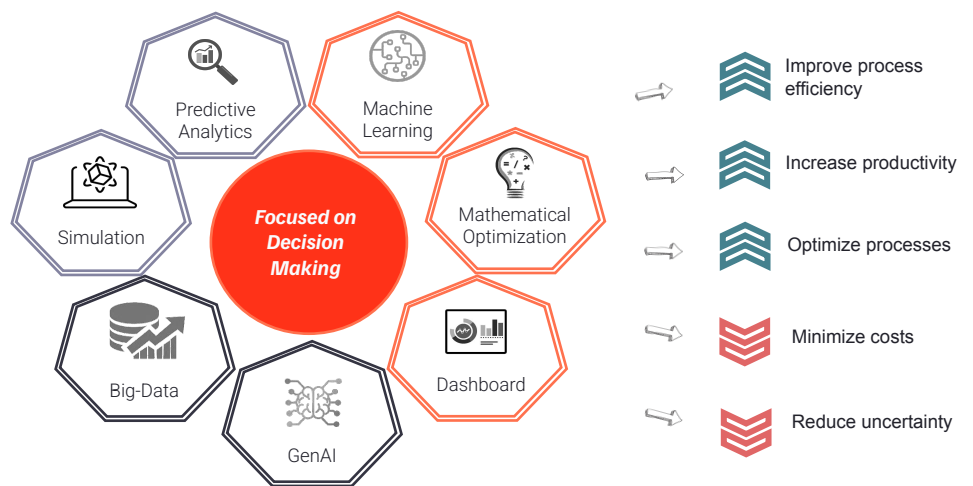

Our main projects have to do with the development of computational optimization and decision-making tools to support various operational, tactical and strategic problems.

Partnership

Certified technical capability

Official Gurobi Optimization Partners

Gurobi Optimization is the most important mathematical software today, used to solve complex optimization problems.

Industries

Oil & Gas

Factory

Logistics & Distribution

Agroindustry

Government and Organizations

Solutions

Supply Chains

Production Planning

Operations Scheduling

Process and System Simulation

Logistics of Last Mile

Data Analytics and Prediction
